

Dr. Michael J. Katchabaw

Dr. Michael Katchabaw is an Assistant Professor in the Department of Computer Science at University of Western Ontario. He is also a co-founder of the Digital Recreation Entertainment Art and Media (DREAM) research group at Western. He personally leads or has been involved in many research projects investigating various aspects of video game development, as well as several research networks studying various issues in game design and technology. Of particular interest are character development and behaviour in games, storytelling within games, music and audio in games, and networking issues in multiplayer games. Dr. Katchabaw is currently a member of the IEEE, ACM, IGDA, and CGSA.
